

## ANIXTER CABLE TRAY CART

Anixter's cable tray carts reduce the labor and installation time to install cable tray in large installations. Anixter loads the tray into the carts at our facility per your implementation schedule. The carts can be labeled for the area where they will be installed and delivered just as they are needed to reduce on-site storage. Large laydown areas are needed for cable tray that may not be available. Anixter stocks the tray close to your job site and delivers as your installation schedule dictates.

### Benefits:

- Increases job site mobility
- Reduces labor in storing and sorting cable tray on site
- Side rails are removable for easy loading and unloading
- Tray can be loaded and labeled per installation area

Contact your Anixter representative for more information.
