

# Services to Scale Your Business Today

From improved productivity for contractors, integrators and installers to reliable scalability and interoperability for end users, we have solutions for every challenge that can help you save time, improve productivity, increase profitability and mitigate risks.

## Supply Chain Programs

Supply Chain Programs are designed to help our customers work smarter and more productively. We build tailored integrated supply programs that optimize operational efficiencies, provide visibility and enable scalability.

Our Supply Chain Program customers benefit from:

- Working capital improvements
- Capex/opex deferral
- Cash-to-cash cycle improvements
- Reduction in scrap/obsolescence
- Sourcing improvements

**SAVE  
TIME**

**IMPROVE  
PRODUCTIVITY**

**INCREASE  
PROFITABILITY**

**MITIGATE  
RISK**

## Project Deployment Services

Project Deployment Services scale our installation enhancement services to save time, provide consistency and improve scalability across multifaceted deployments.

Project Deployment Services are designed for projects involving:

- Multiple product sets
- Multiple contractor, integrator and/or installers
- National and/or global rollouts
- Large inventory quantities and values
- Systems integrations

## Installation Enhancement Services

Installation Enhancement Services involve adapting products and their packaging to speed and streamline deployment and reduce the total cost of installation.

Some popular examples of our Installation Enhancement Services designed for installers and contractors include:

- Asset tagging
- Camera configuration and IP addressing
- Capacitor building
- INSTA-REEL
- Kitting - for all types of environments, including: data centers, commercial buildings, manufacturers and storm recovery for utilities
- Labeling
- Metering services
- PARAPULL<sup>SM</sup>
- PARASPIN<sup>SM</sup>
- Patchcord labeling and bundling
- Pulling eyes
- SPEEDPULL<sup>®</sup>
- Stripping, dyeing and coiling
- Whole order delivery

# Your Success Is the Focus of Our Services

Discover how we can help you **reduce costs, improve profitability, drive growth, meet safety goals** and **exceed deployment expectations** - for both planned and emergency projects.

## Real Project Examples

### Supply Chain Programs

#### Supply Chain Program Increases Consistency, Improves Response Times and Saves \$1.5 Million Across Eight Locations

A tailored Supply Chain Program for strategic sourcing, inventory ownership and management programs helped the service provider realize \$1.5 million in product, facilities and personnel costs, all while improving consistency and response times.

- Reduced inventory by 50 percent
- Transferred warehouse facilities and personnel to Anixter
- Removed \$250 million in capital expenses
- Saved \$850,000 in annual interest on materials

### Project Deployment Services

#### Project Deployment Services Improve Visibility, Speed Deployment and Save \$150,000 Across Six-City Project

Anixter's Project Deployment Services were able to consolidate and centralize inventory and hold it at Anixter locations close to the integrator's sites, reducing working capital, speeding deployment and saving the integrator \$150,000.

- Consolidated over 90 manufacturers to 12 and leveraged spend
- Online business solutions improved supply chain visibility
- Reduced inventory and working capital costs
- Mitigated freight costs and minimized deployment times

### Installation Enhancement Services

#### Installation Enhancement Services Reduce Installation Time by 90 Percent and Save Over \$10,000

Installation Enhancement Services, including cutting to exact circuit length, color feeders that eliminated faze tape, disposable pully lines with staggered lanyards, enhanced PARASPIN with removable casters and layered multiple circuits, helped the contractor streamline and speed the installation and save over \$10,000 in labor costs.

- 16 labor hours vs. 160 labor hours
- Two-person crew over one day vs. four-person crew over five days
- \$1,200 vs. \$12,000 in labor
- Minimized non-productive labor
