

WHOLE ORDER DELIVERY

Anixter's whole order delivery service prepares a single, organized shipment of the multiple products needed for each phase of installation. Color-coded shrink wrap, labels and pallet packing list per pallet make your products easy to identify.

- Receiving a single complete shipment per site eliminates lost or late material and trips to will call
- Minimizes truck rolls
- Color-coded shrink wrap and/or white paper labels with black printing make products easy to identify at a busy jobsite
- Reduces labor effort to find material
- If utilized, a special packing list per pallet reduces the time to confirm items during receiving
- A single complete shipment means a single receiving process and a single invoice, streamlining receiving and payables processes
- Cuts labor costs by reducing labor needed to receive, store, transport and sort on site
- Minimizes freight costs by reducing the number of shipments per PO
- Keeps products organized on site
- Sorted by jobsite location to easily identify where material needs to be
- Improves safety by reducing risks associated with material handling

Contact your local Anixter representative to implement whole order delivery at your jobsite, or visit anixter.com/contractors to learn more about Anixter's contractor services.
