

## ANIXTER DEPLOYMENT BASKETS

Anixter's deployment baskets make the shipping and storing of consumables and reels of cable at the job site fast and easy. The baskets are on-site containers that are preloaded with consumable products or reels of cable that are specific to the job requirements. The baskets will be preloaded with Anixter provided materials, delivered to the job site on time, and then returned to Anixter for replenishment. Increase productivity and reduce labor by minimizing trips to the storage area.

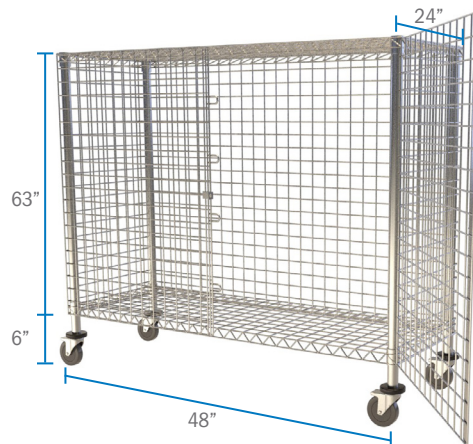

### FEATURES AND BENEFITS:

- Open mesh construction for excellent visibility, easy inventory control and the elimination of dust and dirt build-up
- Channel-formed steel base with heavily reinforced sides and corners
- Powder coat finish resists rust and corrosion
- Stacking legs permit handling by forklift or pallet truck
- Sets up in seconds and folds to save space and shipping costs
- Just-in-time delivery
- Makes moving material to installation site safe and easy, thus decreasing risk of injury
- Securely stores material to diminish theft
- Keeps material organized to reduce nonproductive labor and installation time
- Minimizes packaging material; great for data centers where packaging dust is not permitted
