

MORE+ PRODUCTS TO BUILD, CONNECT, POWER, AND PROTECT APPLICATIONS AND ENVIRONMENTS AROUND THE WORLD

As data centers continue to expand exponentially, driven by the Internet of Things (IoT), convergence, streaming and in-home technologies, as well as disruptive technologies such as microgrids and vehicle sharing, the need to maintain data center infrastructure flexibility and reduce time to market can put pressure on builders, owners and operators looking for ways to manage costs.

From construction to the continual evolution of data center environments, our proven solutions and services portfolio can help you maximize efficiency and resiliency to create smarter outcomes in both gray and white space.

Data Centers

MORE+ Data Center Expertise

WESCO and Anixter is focused on understanding your data center challenges and addressing your project needs. From assistance with product specifications to utilizing our time-saving deployment services, we drive efficiencies while helping you build reliable, flexible and resilient data centers.

SOLUTIONS FOR DATA CENTERS

WESCO®

ANIXTER

ELECTRICAL INFRASTRUCTURE

- 5–35 kV power cable
- Bare copper
- Building wire
- Flexible battery cable
- Grounding and bonding
- Innerduct & conduit
- Low-voltage cable
- Lugs and connectors
- Power whips
- Switchgear
- Transformers
- Wire ties & labeling

LIGHTING SOLUTIONS

- Intelligent lighting
- Lighting controls

NETWORK INFRASTRUCTURE

- Building entrance protection (BEP)
- Cable management
- Cable runway & raceway
- High-performance copper & fiber cabling systems
- Intelligent infrastructure management (IIM)
- KVM solutions
- Media converter
- Power & asset management
- Power over Ethernet
- Racks & cabinets
- Switches & routers
- Transmission & access products
- Test equipment & tools
- Wireless Ethernet

SECURITY SOLUTIONS

- Access control
- Asset tracking
- Cabinet electronic locking
- Intercom, sound & paging
- Perimeter detection
- Security consoles, racks & cabinets
- Video monitors
- Video surveillance

THERMAL SOLUTIONS

- High airflow dispersion floor tiles
- Network & environmental monitoring
- Power surge & transient voltage surge
- Rack-mount power distribution
- Thermal management: passive, hot and cold aisle containment, in-row closed coupled & precision cooling solutions
- Uninterrupted power supplies (UPS)

SERVICES FOR DATA CENTERS

Advisory Services

- Engineering services for greenfield and brownfield data centers
 - Product & specification review
 - Compliance reviews
 - Value engineering/alternatives
- Supply chain assessments
 - Supply rationalization

Installation Enhancement Services

- Labeling
- Kitting
- Prefabrication & assembled solutions
- Cable management
- Deployment carts
- Pre-provisioning
- INSTA-REEL
- PARASPINSM

Project Deployment Services

- Logistics planning
- Whole order delivery
- Project planning & management
- On-site materials management

Supply Chain Programs

- Materials & inventory management
- Global Service Agreements

Financial Services

- Lease financing
- Project accounts
- Custom consolidated invoicing
- Diversity spend

Product and service availability varies by geography.
