

PRODUCT SOLUTIONS BRIEF
ARECONT VISION®

DATA CENTER FACILITY RISK MANAGEMENT

Through our strong global partnerships and alliances with manufacturers such as Arecont Vision, we are able to present you with the following offering to meet your specific data center requirements.

SurroundVideo® Series

Arecont Vision's multi-sensor, multi-megapixel SurroundVideo cameras provide an all-in-one solution for capturing wide-area video surveillance while maximizing the field of view and reducing the total number of cameras required. Cameras include four sensors housed in an IK-10 impact-resistant, IP66 environmentally rated dome enclosure. Models are available in 180°, 360° and omni-directional panoramic configurations with resolutions of 5MP, 8MP, 12MP, 20MP, and 40MP.

SurroundVideo G5 Mini and the SurroundVideo Omni G3.

CHALLENGE SOLVERS

- Technology delivers superior image quality and reduces overall system cost by covering large areas with fewer cameras with outstanding clarity. An area typically requiring multiple pan/tilt/zoom (PTZ) or fixed cameras can be covered with a single SurroundVideo series camera.
- SurroundVideo multisensor cameras easily capture moving objects in both day and night, delivering comprehensive coverage and forensic detail.
- The P-iris motorized lens easily focuses each of the camera's sensors on SurroundVideo G5 models. Once mounted, the operator can quickly focus and position the camera remotely, eliminating the need to adjust the camera while on a ladder.
- STELLAR™ technology uses a patented algorithm that reduces noise, motion blur, bit rate and storage requirements on 5MP SurroundVideo G5 models. STELLAR has superior low-light sensitivity, making it capable of covering areas where very little light is present.

THE ANIXTER APPROACH

- **Perimeter defense**
Establish a physical boundary at the property edge to deter external threats.
- **Clear zone**
Create a buffer zone between the perimeter and the facility to better detect physical intrusion.
- **Reception area**
Control visitors to the facility and validate authorized access to the data center.
- **Service corridor**
Monitor the internal passages to defend against unauthorized mobility within restricted areas.
- **Data room**
Implement high-security electronics to prevent general personnel or intruders from accessing sensitive areas.

THE ARECONT SOLUTION

LENS OPTION	MOUNT OPTION	HOUSING
2.1 mm to 16 mm (SurroundVideo Omni models only)	Pole Pendant Wall Flush Corner Surface	Indoor/Outdoor surface

Leading the Way in Megapixel Video™

WHAT WE HEAR

Challenges from various data center stakeholders:

PROTECTING the company's image

ACHIEVING regulatory compliance (HIPAA, PCI DSS, SOX, GLB)

BALANCING investment in both physical and logical security

STAYING one step ahead of adversaries with technology

EXECUTING policies and procedures specific to the data center

Infrastructure as a Platform
by Anixter

Infrastructure as a Platform by Anixter provides a practical, configurable and integrated approach to deploy physical security infrastructure into your healthcare environment.

CONFIGURE

We help you discover and map your specific needs to the best solution.

- Panoramic configuration
- Resolution
- Housing
- Lens type

BUNDLE

Your validated, preconfigured solutions are packaged and site ready.

- Junction box
- Mount adapter
- Mount bracket
- Heater kit

DEPLOY

Controlled, repeatable solutions are delivered on time and under budget.

- Custom packaging and labeling
- Time-sensitive delivery options
- Staged project shipping
- Tailored last-mile delivery

ARECONT VISION SURROUNDVIDEO SERIES INCLUDES:

- SurroundVideo G5
- SurroundVideo G5 Mini
- SurroundVideo Omni G2
- SurroundVideo Omni G3
- SurroundVideo

FEATURES

✓ BALANCING INVESTMENT IN PHYSICAL AND LOGICAL SECURITY

- Seamless panoramic full horizontal field of view on 180° models.
- Cameras can be strategically placed to capture important details.
- Multisensor, multimegapixel cameras can replace conventional or pan/tilt/zoom cameras.
- P-iris lens on SurroundVideo G5 models provide automatic, precise iris control for applications with varying lighting conditions.

✓ HELPS TO ACHIEVE REGULATORY COMPLIANCE

- Video documentation to mitigate potential for legal liability
- Overall security, life safety and situational awareness requirements
- Ability to cover more with less for situational awareness
- Increased detail for better forensics and reduced time from police and healthcare security professionals in post-event investigations

About Anixter: [anixter.com/aboutus](https://www.anixter.com/aboutus)

Legal Statement: [anixter.com/legalstatement](https://www.anixter.com/legalstatement)

At Anixter, we enable the connected world. By building, connecting, protecting and powering valuable assets and critical infrastructures, we help to sustain and grow businesses and communities worldwide. We accomplish this by offering full-line solutions, technical intelligence, supply chain expertise and an unmatched global distribution network.
