

PRODUCT SOLUTIONS BRIEF
CORBIN RUSSWIN | SARGENT

MICRO DATA CENTER RISK MANAGEMENT

Through our strong global partnerships and alliances with manufacturers such as Corbin Russwin and SARGENT, we are able to present you with the following offering to meet your specific data center requirements.

SE LP10 Integrated Wiegand Access Control Lock

Available from ASSA ABLOY Group brands Corbin Russwin and SARGENT, the SE LP10 brings a new level of flexibility to access control solutions. The Integrated Wiegand access control lock combines a card reader, Door Position Switch (DPS) and Request-to-Exit (REX) signaling. SE LP10 products are easily integrated into a Wiegand-compatible access control system and offer fail-safe or failure secure operations listed to the UL 294 standard.

Designed for mixed credential environments and easy migration to higher security credentials.

CHALLENGE SOLVERS

- Features multiCLASS SE® technology from HID Global®, which supports multiple industry-leading credentials and makes the system ideal for mixed credential populations and facilities transitioning to higher security credentials.
- Available in mortise lock, cylindrical lock and a variety of exit device configurations.
- The SE LP10-F model is designed for secure physical access projects that must comply with Personal Identity Verification (PIV) standards under Federal Information Processing Standards (FIPS) 201.
- Requires just one cable run from lock to access panel, which means significantly faster installation time, lower installation costs and reduced disruption.

THE ANIXTER APPROACH

- **Perimeter defense**
Establish a physical boundary at the property edge to deter external threats.
- **Clear zone**
Create a buffer zone between the perimeter and the facility to better detect physical intrusion.
- **Service corridor**
Monitor the internal passages to defend against unauthorized mobility within restricted areas.
- **Data room**
Implement high-security electronics to prevent general personnel or intruders from accessing sensitive areas.

WHAT WE HEAR

Challenges from various data center stakeholders:

PROTECTING the company's image

ACHIEVING regulatory compliance (HIPAA, PCI DSS, SOX, GLB)

BALANCING investment in both physical and logical security

STAYING one step ahead of adversaries with technology

EXECUTING policies and procedures specific to the data center

Infrastructure as a Platform
by Anixter

Infrastructure as a Platform by Anixter provides a practical, configurable and integrated approach to deploying physical security infrastructure into your data center environment.

CONFIGURE

We help you discover and map your specific needs to the best solution.

- Card reader
- Hardware finish
- Cylindrical lock options
- Power requirements

BUNDLE

Your validated, preconfigured solutions are packaged and site ready.

- Wiegand access control system
- HID Global's SIO™ digital credential
- Digital IP cameras
- Software and storage

DEPLOY

Controlled, repeatable solutions are delivered on time and under budget.

- Custom packaging and labeling
- Time-sensitive delivery options
- Staged project shipping
- Tailored last-mile delivery

SE LP10 FEATURES

✓ EXECUTE SECURITY POLICIES REMOTELY

- Provides ability to control all locks centrally
- Field configurable to fail-safe or fail-secure
- Supports multiple credential types
- Direct Wiegand output eliminates the need for an interface panel
- Supports HID Mobile Access® powered by Seos®
- Lockdown capable

✓ STAY AHEAD OF ADVERSARIES

- Industry-leading Grade 1 hardware
- Provides heightened security with multiCLASS SE technology from HID Global
- Open architecture platform
- Integrated design incorporates all access control components
- Supports data authentication and encryption
- Intelligent power management

Integrated design incorporates all access control components.
