

PRODUCT SOLUTIONS BRIEF
AXIS COMMUNICATIONS

DATA CENTER RISK MANAGEMENT

Through our strong global partnerships and alliances with manufacturers such as Axis, we are able to present you with the following offering to meet your specific data center requirements.

Axis Data Center Service Corridor Network Cameras

Most data centers have significant focus on the white space of the data center room, but the gray space, hallways and escorted areas that lead to the data center floor are frequently areas where proper security measures are overlooked.

Axis has a complete line of network cameras designed to provide high-resolution video and a wide viewing angle to cover a significant area.

AXIS P1365 delivers HDTV 1080p video that provides extreme detail in complex lighting conditions.

CHALLENGE SOLVERS

- Mitigation of tailgating and unauthorized access
 - Network video devices can be fitted with a people-counting module, which records the number of people passing through each door directly into the data center.
- Effectively monitoring corridor spaces
 - Axis Corridor Format provides a vertically oriented, portrait-shaped video stream from the camera resulting in a 9:16 aspect ratio that is just the right size for narrow corridors, hallways or aisles.
 - P-Iris improves image quality by providing an automatic, precise iris control that improves contrast, clarity, resolution and depth of field, making it perfect for indoor applications where light levels could vary.
- Protect access to telecom entrance rooms and power and cooling equipment areas
 - Axis Cross Line Detection spots moving objects that cross a virtual line, making it possible to automatically trigger an event.
 - Advanced motion detection can integrate with the camera's internal event manager, enabling various system notifications and providing a proactive security response.

THE ANIXTER APPROACH

Six Layers of Physical Security – The Axis solutions on this brief focus on Layer 4:

- **Service corridor**
 Monitor the internal passages to defend against unauthorized mobility within restricted areas.

THE AXIS SOLUTION

FIXED DOME NETWORK CAMERAS	FIXED NETWORK CAMERAS	CAMERA ACCESSORIES
AXIS P3354	AXIS P1365	Video management software Mounts Microphones

WHAT WE HEAR

Challenges from various data center stakeholders:

PROTECTING the company's image

ACHIEVING regulatory compliance (HIPAA, PCI DSS, SOX, GLB)

BALANCING investment in both physical and logical security

STAYING one step ahead of adversaries with technology

EXECUTING policies and procedures specific to the data center

Infrastructure as a Platform
by Anixter

Infrastructure as a Platform by Anixter provides a practical, configurable and integrated approach to deploying physical security infrastructure into your data center environment.

CONFIGURE

We help you discover and map your specific needs to the best solution.

- Resolution
- Frame rate
- Range of motion
- System integration

BUNDLE

Your validated, preconfigured solutions are packaged and site ready.

- Video management software
- PoE midspan and splitters
- Media converters
- Video surveillance control board

DEPLOY

Controlled, repeatable solutions are delivered on time and under budget.

- Custom packaging and labeling
- Time-sensitive delivery options
- Staged project shipping
- Tailored last-mile delivery

SERVICE CORRIDOR CAMERA FEATURES

✓ FIXED DOME NETWORK CAMERAS

- Delivers 30 fps in all resolutions up to HDTV 720p/1MP
- Supports digital pan/tilt/zoom
- Easy installation with remote focus and zoom

✓ FIXED NETWORK CAMERAS

- Delivers HDTV 1080p video in 50/60 fps
- Multiple lens options
- Built-in microphone

With its tamper-resistant casing, AXIS P3354 is specifically designed for indoor environments.
