

PRODUCT SOLUTIONS BRIEF
BOSCH

COMMERCIAL BUILDING RISK MANAGEMENT

Through our strong global partnerships and alliances with manufacturers such as Bosch, we are able to present you with the following offering to meet your specific commercial building requirements.

Praesideo Public Address and Emergency Sound System

Bosch's Praesideo is a complete, full featured digital public address and emergency sound system. It leads the market in reliability, especially in voice evacuation, and it has demonstrated years of performance in a wide range of applications. With more than 6,000 installed systems worldwide, it is the number one solution for demanding public address and emergency sound applications.

Praesideo public address and emergency sound system

CHALLENGE SOLVERS

- It is fully supervised and ensures message integrity by constantly monitoring system control, amplifier operation, microphones, loudspeaker line integrity and individual loudspeakers.
- The various elements of the Praesideo system are connected via an interference free optical network, allowing equipment to be conveniently located where it's needed.
- For added reliability and uninterrupted operation especially in emergency situations in voice alarm installations, the network can be configured as a "redundant loop" that ensures the system will operate smoothly even if there is a physical break in the fiber optic cable.
- As part of Bosch Security Systems' commitment to meeting international standards, Praesideo meets legislated requirements for voice alarm systems.

THE ANIXTER APPROACH

- **Property perimeter**
Establish a physical boundary around the property edge to deter external threats.
- **Reception area**
Control visitors to the facility and validate various levels of staff authorization.
- **Floor levels**
Monitor visitor and employee traffic for safety and access to various parts of the building
- **Specialized zones**
Secure assets and comply with privacy regulations with attention to specialized departmental zones.
- **Technical space**
Protect networking infrastructure, IT servers and data storage in technical areas.

THE BOSCH SOLUTION

CALL STATIONS	AMPLIFIERS	SPEAKERS
Basic Keypad Numeric keypad	Basic Powered Multichannel interface	Ceiling Wall mount Hemi directional

WHAT WE HEAR

Challenges from the various commercial building stakeholders are:

Providing a **SAFE** workplace

Reducing **THEFT**

Achieving **REGULATORY COMPLIANCE**

Preventing **CYBER THREATS**

Limiting physical building and network **ACCESSIBILITY**

Infrastructure as a Platform
 by Anixter

Infrastructure as a Platform by Anixter provides a practical, configurable and integrated approach to deploy physical security infrastructure into your commercial building environment.

CONFIGURE

We help you discover and map your specific needs to the best solution.

- System components
- Praesideo peripherals
- Required accessories
- Software

BUNDLE

Your validated, preconfigured solutions are packaged and site ready.

- Mixing processors
- Amplifiers
- Software controls
- Call stations

DEPLOY

Controlled, repeatable solutions are delivered on time and under budget.

- Custom packaging and labeling
- Time-sensitive delivery options
- Staged project shipping
- Tailored last-mile delivery

BOSCH PRAESIDEO FEATURES

✓ PROVIDES A SAFE WORKPLACE

- High level of redundancy
- Voice alarm applications
- Monitors system, control, amplifier operation and microphones
- Extensive logging of calls and fault events

✓ ACHIEVES REGULATORY COMPLIANCE

- Certified according EN 54-16, ISO 7240-16 and EN 60849
- Compliant with BS 5839:8
- SOLAS certified
- Certified partner program allows for installations compliant to local standards

Call stations are ideal for medium- and large-scale public address and voice alarm applications.
