

PRODUCT SOLUTIONS BRIEF

CHATSWORTH PRODUCTS

HIGHER EDUCATION NETWORK PERFORMANCE

Through our strong global partnerships and alliances with manufacturers such as Chatsworth (CPI), we are able to present you with the following offering to meet your specific campus facility requirements.

N-Series TeraFrame® Gen 3 Network Cabinet System

CPI's N-Series TeraFrame Gen 3 Network Cabinet System addresses thermal efficiency challenges commonly experienced in the data center. In addition to airflow management and control, the N-Series offers flexibility for both network and storage environments.

CHALLENGE SOLVERS

- Patent-pending side-intake duct adjustable to support any switch size on site
- Vertical exhaust duct option and compatibility with both hot- and cold-aisle containment configurations
- Frame design for proper clearance for side airflow switches

THE ANIXTER APPROACH

- **Network Flexibility**
Apply open-architecture designs to accommodate your performance requirements for a highly scalable network.
- **Media Selection**
Choose the appropriate physical media from twisted-pair and optical fiber to support both wireless and wired connectivity.
- **Cabling Topology**
Select an application-independent cabling architecture to support inter- and intra-building network connectivity.
- **Wireless Mobility**
Determine your migration path for wireless connectivity to support a device-dependent and multiscreen environment.
- **Application Support**
Deploy scalable designs that can support multiple and varied applications over wired and wireless connectivity solutions.

THE CPI SOLUTION

DIMENSIONS	DOOR/PANEL OPTIONS	CABINET ACCESS CONTROL
Height Width Depth	Front Rear Top Side	Latch and lock kits

Complete airflow isolation for high-density network and storage switches

CHATSWORTH PRODUCTS

WHAT WE HEAR

Challenges from the various higher education stakeholders are:

MANAGING DATA
and governance

Meeting **WIRELESS CONNECTIVITY** expectations

Supporting new **LEARNING MODELS**

Leveraging **ANALYTICS** to improve performance

Coping with **INCREASING BANDWIDTH**

Infrastructure as a Platform
by Anixter

Infrastructure as a Platform by Anixter offers a standards-based, physical layer approach that provides a foundation to meet the high-performance networking demands of your campus environment.

CONFIGURE

We help you discover and map your specific needs to the best solution.

- Form factor and color
- Airflow manager
- Doors and latches
- Panels and cable entry style

BUNDLE

Your validated, preconfigured solutions are packaged and site ready.

- Blanking panels
- Cable management
- eConnect® PDUs
- Aisle containment

DEPLOY

Controlled, repeatable solutions are delivered on time and under budget.

- Custom packaging and labeling
- Time-sensitive delivery options
- Staged project shipping
- Tailored last-mile delivery

N-SERIES TERAFRAME FEATURES

✓ AIRFLOW SEGREGATION

- Complete separation of hot and cold air within the cabinet
- Vertical exhaust duct available to maintain airflow segregation strategy

✓ DENSITY DEMANDS

- Engineered cabinet designed for high-density network and storage applications
- Wider network cabinet compatible with F-Series TeraFrame and GF-Series GlobalFrame server cabinets

✓ AIRFLOW CONTROL

- Preconfigured to include front-to-rear, rear-to-top, side-to-rear and side-to-top airflow
- A universal side airflow solution to eliminate switch-specific accessories

✓ NETWORK FLEXIBILITY

- Design that offers maximum cable management flexibility from either side of cabinet
- Flexibility for mounting equipment, thermal, cable and power management accessories

Vertical exhaust duct option to maintain airflow segregation
